

## Task: Create a Serverless Function (AWS Lambda / Cloud Function)

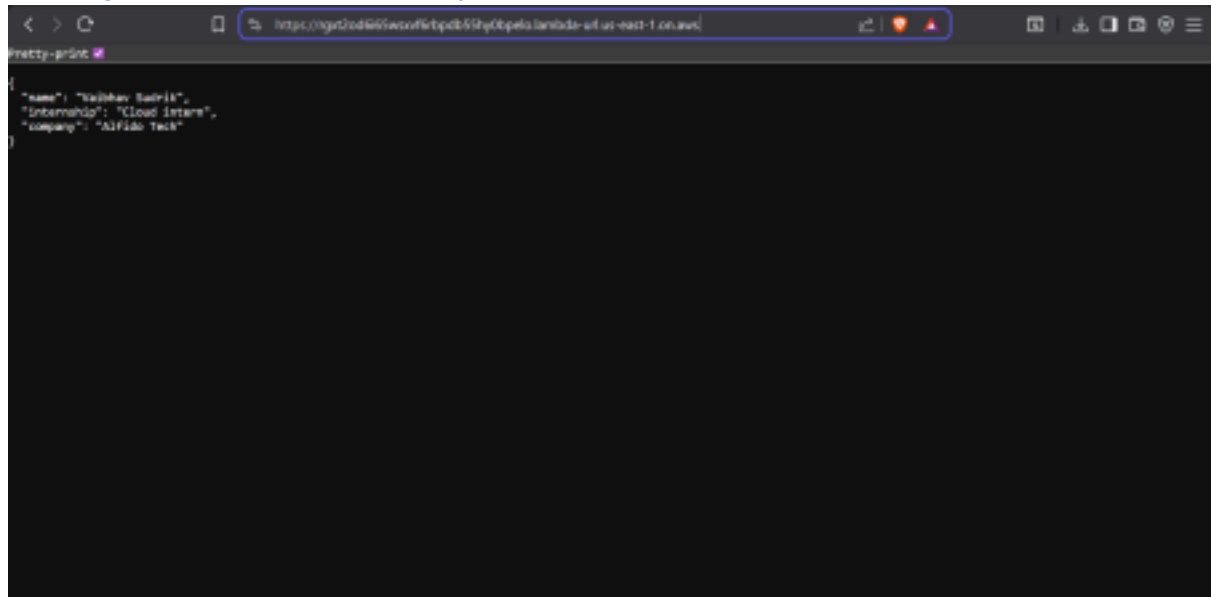

Name: Arjun Dongare

Internship: Cloud Computing

Task No: 3

### 1) Endpoint URL returning JSON

<https://rgxt2od6i65wsxvf6rbpdb55hy0bpelo.lambda-url.us-east-1.on.aws/>

### 2) Code of function

```
import json
def lambda_handler(event, context):
    response = {
        "name": "Vaibhav Sudrik",
        "internship": "Cloud intern",
        "company": "Alfido Tech"
    }

    return {
        "statusCode": 200,
        "headers": {
            "Content-Type": "application/json"
        },
        "body": json.dumps(response)
    }
```
